Seed Processing Plant for Cereals

Processing capacity: 20 t/h

Year: 2016

Capacity and Designation:

Seed processing plant, incl. intake, dust extraction system, de-awner, cleaner, indented cylinders, gravity table, optical sorter, batch chemical treater as well as aspiration system, central control system, divers conveying equipment, steel construction, operator platforms, buffer bins, loading silo cell and storage silos with accessories

- Storage capacity: 1800 t
- Processing capacity: 20 t/h

PETKUS Service:

- Planning, execution and commissioning
- Engineering and conceptual design and planning of the plant including assembly and infrastructure
- Service including technology consulting, project preparation and planning, steel construction, electrical installation as well as required processing technologies and training of the operating personnel
- Delivery of the entire process technology from intake to chemical treating and construction of the silo complex
